PRODUCT FACT SHEET

CPH 30 EXTENDABLE

DESIGN BY RONAN & ERWAN BOURULLEC, 2019

Part of the Copenhagen range designed by Ronan and Erwan Bouroullec, the CPH30 Extendable shares the same characteristic angled legs and strong identity that are consistent with the rest of the collection, yet its extendable design sets it apart. Supplementary extension leaves can easily be inserted into the table's central sliding mechanism, allowing the table to be extended to the required length. The table frame comes in a variety of sizes, wood types and finishes, with the tabletops offered in different materials and finishes. The CPH 30 Extendable's versatile design and flexible length makes it suitable for offices and public contexts, as well as workspace or dining solutions in home environments.

HIGHLIGHTS

FRAME

Slanted, solid wooden legs featuring non-visible integrated screw-in adjustable feet that can be extended up to 12 mm to make the table level on uneven surfaces.

CONSTRUCTION

The tabletop has a pre-mounted aluminum slide mechanism with lock and solid oak wood crossbars. It rests upon two sets of angled solid oak wood legs, which needs to be mounted to the tabletop.
